

Permanent Magnets 2010-2020

Table of Contents

Introduction

1.0 2005-2009 Permanent Magnet Production Statistics

1.1 Total Magnet Production 2005-2020

1.2 2005-2009 Magnet Production by Material Type

- 1.2.1 Ferrite
- 1.2.2 NdFeB
- 1.2.3 SmCo
- 1.2.4 Alnico

1.3 2005-2009 Magnet Production by Geographic Region

- 1.3.1 China
- 1.3.2 Europe
- 1.3.3 Japan
- 1.3.4 USA
- 1.3.4 All Others

1.4 2005-2009 Magnet Production Market Share

2.0 2010-2020 Permanent Magnet Production Forecast

2.1 2010-2020 Magnet Production Forecast by Material

- 2.1.1 Ferrite
- 2.1.2 NdFeB
- 2.1.3 SmCo
- 2.1.4 Alnico

2.2 2010-2020 Production Forecast by Geographic Region

- 2.2.1 China
- 2.2.2 Europe
- 2.2.3 Japan
- 2.2.4 USA
- 2.2.5 All Others

2.3 2010-2020 Production Market Share Forecast

3.0 Current & Future Applications and Technologies

- 3.1 Introduction
- 3.2 Computer Hard Drives
- 3.3 Permanent Magnet Motors
 - 3.3.1 Industrial Motors
 - 3.3.2 Automotive Motors
 - 3.3.3 Hybrid & Electric Vehicles
 - 3.3.4 Electric Bicycles
 - 3.3.5 Appliances & HVAC
 - 3.3.6 Other Motor Applications
- 3.4 Loudspeakers
- 3.5 Wind Turbines
- 3.6 Sensors
- 3.7 Magnetic Resonance Imaging
- 3.8 Magnetic Separation Equipment
- 3.9 Consumer Electronics
- 3.10 Advertising and Promotional Products
- 3.11 Magnetic Braking Systems
- 3.12 Magnetically Levitated Transportation Systems
- 3.13 Military & Aerospace
- 3.14 Reprographics
- 3.15 Magnetic Refrigeration Systems
- 3.16 Energy Storage Systems
- 3.17 Permanent Magnet Nano-Technology
- 3.18 Other Applications
- 3.19 Future Energy Efficiency Drivers

4.0 China's Current and Future Industry Status

- 4.1 China's Production Statistics
- 4.2 China's production Forecast 2010-2020
 - 4.2.1 Sintered Ferrite
 - 4.2.2 Bonded Ferrite
 - 4.2.3 Sintered NdFeB
 - 4.2.4 Bonded NdFeB
 - 4.2.5 Samarium Cobalt
 - 4.2.6 Alnico
- 4.3 Chinese Government's Magnet & Rare earth Strategy
- 4.4 Summary

5.0 Review and Update of Major Magnet Industry Patents

- 5.1 Alnico
- 5.2 Ferrite
- 5.3 Samarium Cobalt
- 5.4 Neodymium Iron Boron

6.0 Raw Material Issues Impacting the Magnet Industry

6.1 Iron Oxide

- 6.1.1 The Lurgi Process
- 6.1.2 The Ruthner Process
- 6.1.3 China Enters the Market
- 6.1.4 Pricing
- 6.1.5 Summary

6.2 Cobalt

- 6.2.1 Cobalt Supply
- 6.2.2 Production
- 6.2.3 Demand
- 6.2.4 Price Trends
- 6.2.5 Summary

6.3 Rare Earth Oxides

- 6.3.1 Rare Earth Supply
- 6.3.2 Major Rare Earth Resources
 - 6.3.2.1 Baotou Iron & Steel group
 - 6.3.2.2 Avalon Rare metals, Inc.
 - 6.3.2.3 Great Western Minerals Group Ltd.
 - 6.3.2.4 Lynas Corporation
 - 6.3.2.5 Molycorp Minerals LLC
- 6.3.3 Other Rare Earth Resources
 - 6.3.3.1 Alkane Resources Ltd.
 - 6.3.3.2 Arafura Resources Ltd.
 - 6.3.3.3 Greenland Mineral & Energy Ltd.
 - 6.3.3.4 Rare Element Resources Ltd.
 - 6.3.3.5 U.S. Rare Earths, Inc.
- 6.3.4 Rare Earth Oxide Demand
- 6.3.5 Rare Earth Price Drivers
- 6.3.6 Chinese Government Export Allocations
- 6.3.7 Rare Earth Market Price Sources
- 6.3.8 Summary

7.0 Human Resource Issues Confronting the Magnet Community

- 7.1 The Decline of Western Talent
- 7.2 Momentum is Building in China
- 7.3 Foreign Student Migration to the US
- 7.4 The Impact on the West
- 7.5 Summary

8.0 Review of Current University Magnet Research Initiatives

- 8.1 Ames Laboratory at Iowa State University
- 8.2 University of Birmingham
- 8.3 University of Dayton
- 8.4 University of Delaware
- 8.5 IFW Dresden
- 8.6 National Institute of Materials Science

8.0 Review of Current University Magnet Research Initiatives (continued)

- 8.7 Northeastern University
- 8.8 Southwest Institute of Applied Magnetics
- 8.9 University of Texas at Arlington
- 8.10 Trinity College (University of Dublin)
- 8.11 Technical University of Vienna

9.0 Magnet Industry Associations

- 9.1 China Magnetic Materials Device Association
- 9.2 IEEE Magnetics Society
- 9.3 The Japan Association of Bonded Magnetic Materials
- 9.4 Rare Earth Industry and Technology Association
- 9.5 SMMA - The Motor and Motion Association
- 9.6 UK Magnetics Society
- 9.7 United States Magnetic Materials Association

10.0 Directory of Magnet Producers, Distributors & Fabricators

- 10.1 The Americas (including Central & South America)
- 10.2 Europe & Middle East (including Eastern Europe & Africa)
- 10.3 Asia & Australia (including Japan, Russia, India & New Zealand)

11.0 Directory of Magnetic Powder Producers

12.0 Directory of Magnetic Industry Service Providers

- 12.1 Instrumentation & Measurement Equipment
- 12.2 Software Systems for Magnetic Circuit Design
- 12.3 Industry Consultants
- 12.4 Industry Publications

13.0 Appendices

- 13.1 Permanent Magnet Basics
- 13.2 Magnetic Materials in Automotive Systems
- 13.3 The Development of China's Rare Earth Magnet Industry
- 13.4 Sintered NdFeB Magnets: Neomax Patent & License Status
- 13.5 Magnequench Patent Information Guide
- 13.6 China's Rare Earth Elements Industry: What Can the West Learn?
- 13.7 What Rare Earth Crisis?
- 13.8 Rare Materials – How Scarce are They?

About the Authors

Walter T. Benecki -- Walt graduated from the Penn State University in 1962 with B.S. and M.S. Degrees in Ceramic Engineering. He began his career with RCA as a Development Engineer prior to earning an M.B.A. from the University of Pittsburgh in 1965. For the next twenty-four years, Walt held a variety of strategic planning, marketing, new product development and general management responsibilities with Carborundum, General Electric and Copperweld.

In 1989, Walt was named President of Arnold Engineering (now Arnold Magnetic Technologies). By 2000, Arnold grew to become a profitable worldwide enterprise with sales of \$140 million. Arnold was one of the first companies in the magnetics industry to establish Chinese alliances and commit to manufacturing in mainland China.

Walt was President of MMPA from 1994-1997. Since 2001, Walt heads a consulting practice serving the worldwide magnetics industry.

He is currently a member of the board of directors of SMMA, EMERF and Bunting Magnetics Company. Over the past twenty years, Walt has been a principle or strategic advisor for fifteen successful acquisitions, dispositions or joint ventures within the magnetics industry.

Terry K. Clagett -- Terry is currently President and CEO of WebMagnetics, Inc. Terry has over 30 years of experience in sales, sales management, market development, marketing and general management. He has served the permanent magnet and sealant and adhesive equipment industries at Colt Industries, the Allen-Bradley Company, Crucible Steel and Accumetric. Terry has experience establishing sales organizations serving the European, Canadian, Chinese, Asian and South and Central American markets, including distribution networks.

Terry's permanent magnet expertise includes alnico, sintered and bonded ferrite, samarium cobalt, and sintered and bonded neodymium iron boron. He has executive management experience with off-the-shelf and custom designed equipment for dispensing single and plural component reactive chemicals such as epoxies, polyurethanes (flexible and rigid foams), urethane elastomers and silicones.

He has served on the Board of Directors of the Magnetic Material Producer's Association (MMPA) and on the Editorial Review Board of Adhesive Age Magazine. He has written numerous articles and papers for various trade publications, conferences, seminars and trade shows. Terry holds a B.S. with majors in Chemistry and Biology from Murray State University.

Stanley R. Trout -- Stan's professional life has been almost evenly divided between the permanent magnet and rare earth industries. Previous employers include Magnequench, Molycorp, Hitachi Magnetics, Crucible Magnetics and Recoma. Among Stan's noteworthy projects are: the use of permanent magnets in early MRI systems, the design of break-away goal posts for ice hockey, the use of Helmholtz coils for magnetic measurements and the utilization of hydrogen decrepitation for the size reduction of NdFeB ingots.

Stan has taught physics, materials science, mathematics, astronomy and technical writing for Marian University, Ivy Tech, Alma College and Ellis University.

In 2001, Stan launched Spontaneous Materials, a consultancy offering solutions to technical and commercial problems, and as a resource for technical writing and training. Dr. Trout is a registered professional engineer, with a B. S. in Physics from Lafayette College and a Ph.D. from the University of Pennsylvania in Metallurgy and Materials Science. He is a senior member of the IEEE Magnetics Society, a member of the UK Magnetics Society, SMMA (Small Motor Manufacturing Association) and a board member of EMERF (Electric Motor Education & Research Foundation).

Permanent Magnets: 2010-2020

Order Form (Effective 1-1-2011)

Quantity _____

Total _____

Shipping & Handling (See Table Below) _____

Total Amount Due _____

US \$5,000.00

x _____

= _____

+ _____

= _____

Shipping & Handling Charge (per copy)

Within Continental USA – 1 Day Delivery \$65.00

Within Continental USA – 1 Week Delivery \$35.00

Outside Continental USA – 2 Day Delivery \$250.00

Outside Continental USA – 1 Week Delivery \$160.00

Signature: _____ Date: _____

Submit Payment to:

Terra Magnetica
c/o Technology Metals Research, LLC
180 S. Western Ave #150
Carpentersville, IL 60110
United States of America

Please include a check with your order,
payable to

"Technology Metals Research, LLC";

Alternatively, credit card payments can be
accepted if you give us a call or send an
email first, so that we can make the
appropriate arrangements.

Phone: +1-847-867-3091 (ask for Gareth)
